

Mission Statement

As the popularity and ease of access to the Internet continues to grow at an exponential rate, web based products that are both inexpensive and functional are quickly becoming a necessity for small businesses. Lumis believes that companies need a solution to manage their online resources. The design and development of a website is not inherently a do-it-yourself project. Smart business owners and managers who aren't IT experts need to find quality services and support. They need to use these quality vendors as they use their other professional service suppliers, as trusted allies. Lumis serves our clients as trusted allies, providing them with the loyalty of a business partner and the economics of an outside vendor.

Our mission is to provide Internet based solutions that allow a small business to promote their products and services, as well as serving as a functional tool for both staff and clients. Lumis has endeavoured to promote the use of open source software by creating inexpensive solutions for our clients. We will continue to foster and offer inexpensive open source software and promote seamless small business integration to set us apart from the competition.
